

2.43 Making sentences about 3D shapes

Topic: Shapes

Subtopic: 3D shapes

Activity type/skill: Collocation

Literacy focus: Vocabulary

Objective

- Recognise suitable environments for new words.

What you need

- Student worksheet (see next page)

What to do

1. Look at the student worksheet.
2. Explain to students that, working in groups, they need to construct three sentences using a word from each column. They do not have to use the same form of the words, for example:
 - 'I **measured** two **lines** 10 centimetres long.'

Extending the activity

- Look for words from the target vocabulary list in any text, for example, a maths textbook. Write down the sentences in which they occur and highlight or underline the words.
